## Recommendation Table 3 — Recommendations for infective endocarditis prevention in cardiac procedures

| Recommendations   | Class <sup>a</sup> | Level <sup>b</sup> |
|---|--------------------|--------------------|
| Pre-operative screening for nasal carriage of <i>S. aureus</i> is recommended before elective cardiac surgery or transcatheter valve implantation to treat carriers. <sup>113,114</sup>   | I                  | A                  |
| Elimination of potential sources of sepsis (including of dental origin) should be considered $\geq 2$ weeks before implantation of a prosthetic valve or other intracardiac or intravascular foreign material, except in urgent procedures. | IIa                | C                  |
